DRAGOS ACADEMY COURSE LIST

DRAGOS PLATFORM CERTIFIED USER
A 2-day, scenario-based training class designed to take Dragos Platform users to the intermediate level. Explore the Platform UI, analyze use cases, and learn how to enable them, and increase the Platform time-to-value. Highly recommended for new Dragos Platform users.
Class format: Virtual ILT, In-Person ILT, and On-Demand options available

ICS/OT CYBERSECURITY TRAINING
A 2-day course designed for IT professionals tasked with learning ICS/OT cybersecurity, or for ICS/OT professionals who want to learn more about how IT concepts apply in industrial networks. This course will provide you with the ICS/OT subject-matter foundation necessary to advance into the Dragos Certified User training.
Class format: In-Person ILT, with a new Virtual ILT option available in 2023

ICS CRASH COURSE
Gain a deeper understanding of ICS/OT systems, assessment methodologies, and tools used to improve and mature an OT cybersecurity program.
Class format: On-Demand

CYBERSECURITY CAPABILITY MATURITY MODEL
Learn how to evaluate organizational cybersecurity maturity, using the framework from the Depart of Energy's 10 cybersecurity domains.
Class format: On-Demand

ISA/IEC 62443
An introduction to the ISA/IEC 62443 standards that specify security capabilities for control system components, offering a framework to address and mitigate vulnerabilities in industrial automation environments.
Class format: On-Demand

WATER INDUSTRY BRIEF
Explore the process to treat and distribute drinking water in the United States, including regulatory standards, key manufacturers, common control system architectures and their vulnerabilities.
Class format: On-Demand
