

INDUSTRIAL STRENGTH CYBERSECURITY FOR PHARMACEUTICALS

SECURING AND ACCELERATING DIGITAL TRANSFORMATION

Today's digital technologies have proven their ability to deliver the efficiency and visibility needed to adapt and improve competitive advantage. Because of this, typically risk-averse industries are now beginning to embrace and become comfortable with the idea of broadly implementing digitalization across their operations and supply chain. But new threats from external actors, supply chain compromises, and ransomware can threaten the advancements made toward business transformation.

THE CHALLENGE

For the pharmaceutical industry, ensuring the security of their digitally connected operations is paramount to protecting business continuity, intellectual property, and reputational risk to the corporate brand.

Dragos uniquely addresses these cyber risks with a comprehensive set of offerings that includes technology, professional services, and threat intelligence specific to industrial operational technology (OT). We help companies in the pharmaceutical industry:

- Gain visibility into production operations and distributed supply chains
- Assess risk in the manufacturing environment
- Defend intellectual property from cyber espionage
- Defend against ransomware
- Support adherence to FDA and compliance programs with automated detection of control system changes
- Strengthen IT/OT collaboration

WHY DRAGOS, INC.

Dragos leads the world in industrial cybersecurity, borne from the industrial control system expertise of its team and reflected in its intelligence-driven approach to securing industrial organizations from their adversaries. With many of the world's largest pharmaceutical companies as customers, as well as hundreds of industrial organizations across other industries, you can have confidence in the effectiveness of our solution, as well as the expertise and professionalism of our people and partners.

“Where Dragos differentiates from many [competitors] is in the ICS-focused expertise of its team, reflected in its' intelligence-centric approach, where its deep and detailed knowledge of the specifics of the ICS threat landscape are borne out of experience.”

ON YOUR PATH TO SECURING OT: HOW TO GET STARTED

We understand that the maturity level of OT cybersecurity programs can vary broadly across industries.

At Dragos, we meet our customers where they are on their journey. Companies early in their cybersecurity journey can typically start with our professional services assessments and penetration testing to evaluate their current program. Or, they can subscribe to our WorldView threat intelligence offering for insights and actionable recommendations to help determine cybersecurity tactics and strategies. As customers mature and build their programs, they're better positioned to benefit from implementing and using the Dragos Platform for comprehensive visibility of their ICS/OT assets and best-practice guidance on how to respond to the threats they face.

THE DRAGOS PLATFORM

A MARKET LEADING TECHNOLOGY YOU CAN DEPLOY WITH CONFIDENCE

Dragos codifies the knowledge of our cybersecurity experts into its integrated software technology that provides critical visibility into ICS and OT networks so that threats are identified and can be addressed before they become significant events.

WHAT WE DELIVER:

ICS/OT cybersecurity technology that brings unmatched visibility, threat detection, incident response, and vulnerability management to your industrial environments.

DRAGOS PLATFORM

DRAGOS THREAT INTELLIGENCE

ARM YOUR ORGANIZATION WITH IN-DEPTH VISIBILITY OF INDUSTRIAL THREATS

Dragos Threat Intelligence is backed by the industry's largest and most experienced team of ICS cybersecurity practitioners. Our offering arms your organization with in-depth visibility of threats targeting industrial environments globally and the tried-and-true defensive recommendations to combat them.

WHAT WE DELIVER:

An annual subscription service, providing access to regular reporting, critical alerts, executive insights, webinars, and more.

DRAGOS PROFESSIONAL SERVICES

BUILD AN ICS CYBERSECURITY STRATEGY THAT'S RIGHT FOR YOUR ORGANIZATION

Dragos Professional Services offers you visibility and insight into your organization's OT environment, identification of vulnerabilities and threats, education for practitioners, and overall risk mitigation.

WHAT WE DELIVER:

A team of highly skilled industrial cybersecurity practitioners ready to partner with you to prepare for, respond to, and protect against severe breaches in your ICS/OT environments.

READY TO CONNECT WITH DRAGOS?

No matter where you are on your ICS/OT cybersecurity journey, Dragos has the solution for you. Let us help to get you on the path to a better-informed and better-prepared cybersecurity posture.
